

# Table of Contents

<b>Introduction .....</b>	<b>1</b>
What is 3D Design and Presentation? .....	1
Why Use 3D? .....	2
3D as a Design Tool .....	2
3D as a Presentation Tool .....	3
A Quick-Start Road Map .....	3
How this Book is Organized .....	3
The AutoCAD 3D Design and Presentation Disk .....	4
Conventions Used in this Book .....	5
AutoCAD Exercises .....	5
AutoShade/RenderMan Exercises .....	6
Autodesk 3D Studio Exercises .....	6
Autodesk Animator Exercises .....	6
What You Need To Use this Book .....	6
Basic Software Requirements .....	6
Basic Hardware Requirements .....	7
Terminology Used in this Book .....	8
Understanding the Distinction between 2D and 3D .....	8
Using 2D and 3D Together .....	11
AutoCAD versus 3D Studio for Modeling .....	13
3D Studio versus Autodesk RenderMan for Rendering .....	14
Summary .....	15
<b>1 Stepping from 2D to 3D .....</b>	<b>17</b>
Making the Move to 3D .....	17
Laying the Groundwork .....	18
Choosing AutoCAD Drawings or Models .....	18
Viewing the Drawing File as a Single Drawing .....	18
Viewing the Drawing File as Multiple Drawings .....	18
Viewing the Drawing File as a 3D Model .....	20
Comparing 3D Computer Models to Conventional Prototypes .....	20
Working in the Third Dimension .....	21
Using the World Coordinate System .....	21
Creating User Coordinate Systems .....	22
The UCS Command .....	23
The UCS Dialogue Box (DDUCS) .....	24
The Modify UCS Icon Menu .....	24
Using the UCS Icon .....	26
Testing Out a 3D Exercise .....	27
Returning to the Plan View .....	29
Viewing Drawings in 3D .....	29
Tiled Viewports .....	29
Viewport Entities .....	31
Using the Vpoint Command .....	32
Common Viewport Configurations .....	33

Exercising the Viewport and Vpoint Commands .....	35
Preparation .....	35
Creating the Working Views .....	36
Using Dvlew .....	37
Selecting Entities .....	37
Examining the Dview Options .....	37
Converting from 2D to 3D .....	39
Summary .....	41

## **2 Introducing AutoCAD 3D Modeling Basics ..... 43**

Considering Different Models for Different Needs .....	43
Building Simple Conceptual Models .....	44
Using Models for Analysis .....	44
Communicating with Presentation Models .....	45
Examining Different Computer Modeling Techniques .....	45
Wireframe Models .....	46
Surface Models .....	47
Solid Models .....	48
Selecting the Proper Model Type .....	48
Preparing the Modeling Environment .....	49
Establishing Layer Conventions .....	49
2D versus 3D Layer Names .....	50
Managing Non-Design Information .....	50
Reviewing Some Modeling Basics .....	51
Specifying 3D Points .....	52
Using 3D Point Filters .....	53
Point Filters Exercise .....	53
Modeling Do's and Don'ts .....	54
Flatland .....	54
Changing Elevation versus Moving along the Z Axis .....	54
Changing Elevation versus Using a UCS .....	55
Using Conceptual Modeling Tools .....	55
Modeling with Extruded Entities .....	55
Creating Extruded Entities .....	56
Limitations of Extruded Entities .....	57
Making True 3D Objects .....	58
Creating a Box .....	59
Creating a Wedge .....	60
Creating a Sphere .....	61
Creating a Dish or Dome .....	61
Creating a Torus .....	62
Creating a Cone .....	63
Creating a Pyramid .....	63
Creating a Mesh .....	64
Making Presentation Models Using Face and Mesh Tools .....	65
Using 3D Faces .....	65
Creating a 3D Face .....	65
The 3D Face Options .....	66
Using Pface .....	67

Using 3D Meshes .....	67
Creating a Mesh with Rulesurf .....	67
Creating a Mesh with Tabsurf .....	69
Surfaces of Revolution—Revsurf .....	70
Creating a Surface of Revolution .....	70
Edge-Defined Meshes Using Edgesurf .....	71
The 3DMesh Command .....	72
Exercising the Modeling Basics .....	72
Creating the Poolhouse .....	72
Setting up the Drawing .....	72
Modeling the Site .....	73
Adding the Building Elements .....	78
Creating the Gazebo .....	79
Inserting the Poolhouse Plan .....	79
Adding a Roof to the Poolhouse .....	80
Making the Pool .....	81
Creating the Patio .....	82
Building the Trees .....	82
Creating the Suspension System .....	84
Setting up the Drawing .....	84
Creating the Tire .....	85
Summary .....	110

### **3 3D Solid Modeling ..... 111**

Using Solid Models in Your Work .....	114
AMElite .....	116
Loading AME and AMElite .....	116
Accessing the Solids Commands .....	118
Conceptual Solid Modeling .....	118
Creating a Box (Solbox) .....	119
Creating a Cone (Solcone) .....	120
Creating a Cylinder (Solcyl) .....	122
Creating a Sphere (Solsphere) .....	123
Creating a Torus (Soltorus) .....	124
Creating a Wedge (Solwedge) .....	125
Creating Solids from Existing 2D Geometry .....	127
Creating Solids by Extruding 2D Entities (Solext) .....	128
Creating Solids of Revolution (Solrev) .....	130
Creating Solids from Extrusions (Solidify) .....	132
Creating Composite Solids .....	133
Combining Solids (Solunion) .....	135
Subtracting One Solid from Another (Solsub) .....	136
Defining Solids by Intersection (Solint) .....	137
Building a Solids Toolkit .....	138
Editing Solid Models .....	140
Moving and Rotating Solids (Solmove) .....	140
Creating a Chamfer (Solcham) .....	143
Creating a Fillet (Solfill) .....	145
Modifying a Primitive within a Composite (Solchp) .....	148

Preparing Solids for Rendering .....	150
Creating a Mesh (Solmesh) .....	150
Understanding Special AME Situations .....	151
Building a Caster Project .....	151
Using AME as a Surface Modeler .....	167
Looking at the Options .....	168
Summary .....	169

#### **4 Advanced Modeling Techniques ..... 171**

Editing Your Model .....	171
Using UCS-Specific Commands .....	172
Using Standard AutoCAD Editing Tools in 3D Modeling .....	172
Editing a Mesh .....	173
Modeling for Rendering Efficiency .....	175
Creating 3D Illusions .....	176
Understanding Intersecting Planes .....	177
Using Blocks and Xrefs Effectively .....	178
Swapping Blocks to Achieve Effective Scale of Detail .....	179
Reducing File Size .....	179
Using WBLOCK To Reduce File Size .....	181
Using Xrefs To Reduce File Size .....	181
Reducing Overhead on Solid Models .....	182
Using Solpurge To Purge Files .....	182
Using Solmaint To Purge Files .....	183
Experimenting with Design Alternatives using Xrefs (Release 11) .....	186
Using Third-Party Applications .....	186
Putting It All Together: The Chapel Model .....	187
Setting up the Drawing .....	188
Creating the Base .....	188
Building the Chapel Structure .....	189
Creating the Skin .....	194
Building the Floor .....	197
Furnishing the Chapel .....	199
Summary .....	202

#### **5 Preparing for Rendering ..... 205**

Composing the Views .....	205
Understanding the Dview Command .....	206
Working with Dview .....	206
Using Hide .....	206
Using Hidden Lines on Separate Layers .....	208
Hide Considerations .....	208
Using the Shade Command (Release 11) .....	209
SHADEDGE Options .....	210
SHADEDIF Options .....	210
Tips for Speedy Rendering .....	210
Preparing Your Model for AutoShade .....	211
Preparing the Model .....	211
Using Cameras .....	212

Placing Cameras in a Plan .....	213
Using Vcamera to Place Cameras (Release 11) .....	213
Using Camview To Check Your Cameras .....	214
Editing Camera Settings .....	214
Colors .....	216
Lights .....	216
Placing Lights in a Plan .....	216
Placing Lights with Vlight (Release 11) .....	217
Scenes .....	217
Animation .....	218
Output .....	220
Preparing Your Model for RenderMan .....	221
Differences between AutoShade and RenderMan .....	221
Material Assignment .....	222
Preparing Your Model for 3D Studio .....	222
Mapping and Material Considerations .....	223
Object Definition .....	223
Normals .....	225
Output Options .....	225
DXF .....	225
Filmroll .....	225
Summary .....	226

## **6 Using AutoShade and RenderMan ..... 227**

A Brief Review .....	228
Configuring AutoShade and RenderMan .....	229
Setting Rendering and Display Formats .....	229
Setting the Printer Configuration .....	229
Placing Cameras and Lights .....	230
Moving the Icons .....	230
Rolling the Camera .....	231
Using AutoShade .....	231
Selecting File Formats .....	231
Rendering in AutoShade .....	232
Saving Rendered Images .....	232
Troubleshooting in AutoShade .....	233
Preparing To Render in AutoShade .....	233
Creating Highlights in AutoShade .....	234
Creating Animation in AutoShade .....	243
Using the Animation Tool Kit .....	243
How the ATK Works .....	243
Script Files .....	245
The SHADERFILE variable .....	246
Fly-Throughs .....	246
Object Animation .....	247
Setting the Number of Frames .....	247
Using AFEGA .....	248
Using RenderMan .....	248
RenderMan Basics .....	248

Shaders .....	249
Shaders versus Textures .....	249
Types of Shaders .....	250
Using Shaders .....	250
Using Premade Shaders .....	251
Creating Shaders from Scratch .....	251
Modifying Existing Shaders .....	251
Using Texture Maps .....	254
A RenderMan Exercise .....	255
Simulating the Outdoors .....	258
Adding Sky to a Rendering .....	258
Simulating Sunlight .....	258
Creating Photorealistic Images .....	259
Creating Animation with RenderMan .....	260
Summary .....	261
<b>7 Using 3D Studio .....</b>	<b>263</b>
Recognizing the Five Parts of 3D Studio .....	265
Understanding Basic 3D Studio Concepts .....	268
Antialiasing .....	268
Types of Shading .....	270
256-Color Shading .....	271
Preparing for the 3D Studio Exercises .....	272
Bringing AutoCAD Files into 3D Studio .....	272
Learning 3D Studio Basics .....	276
Rendering in 3D Studio .....	276
Using Lights in 3D Studio .....	277
Using Materials in 3D Studio .....	279
Using Cameras in 3D Studio .....	281
Changing the Camera's Field of View .....	282
Using Maps in 3D Studio .....	286
Using Texture and Reflection Maps .....	289
Using Bump and Opacity Maps .....	293
Using Bump Maps .....	293
Using Opacity Maps .....	296
Creating and Assigning Complex Maps .....	301
Creating a Tile Map .....	303
Using Multiple Maps .....	314
Splitting Objects .....	324
Summary .....	325
<b>8 Still Imaging with 3D Studio .....</b>	<b>327</b>
Understanding Still Imaging Concepts .....	328
Choosing Geometry for Your Still Images .....	329
Looking at Lighting .....	329
Understanding Textures in Your Still Images .....	330
Understanding Photorealism .....	330
Increasing Photorealism .....	341
Creating the Illusion of Sunlight .....	342

Creating Moonlight .....	346
Understanding Radiosity .....	346
Working with Maps .....	348
Drawing Maps .....	348
Creating Organic Maps .....	350
Creating a Texture Map for a Mountain .....	357
Applying the Maps to a Mountain Surface .....	358
Lighting the Mountain .....	362
Creating the Desert Floor .....	364
Creating Man-Made Maps .....	366
Understanding Contrast in Images .....	368
Using Natural Phenomena in Drawings .....	369
Using Sky Images in Drawings .....	369
Using Terrain in Drawings .....	369
Using Water Images in Drawings .....	370
Printing Grayscale Renderings .....	371
Summary .....	372

## **9 Animating with 3D Studio ..... 373**

3D Studio Concepts .....	373
Keyframing .....	374
Animation Output .....	374
FLI Files .....	374
Single-Frame Output .....	375
Choosing Animation Output .....	376
Animation Exercises .....	377
Preparing for Animation .....	377
Animating Objects .....	377
Object Movement .....	377
Using Track Info .....	380
Smoothing the Movement .....	382
Changing an Object's Shape .....	384
Animating the Camera .....	384
Animating Lights .....	387
Animating Materials .....	388
Morphing .....	389
Animated Backgrounds .....	392
Linking Objects .....	392
Animating Natural Phenomena .....	394
Animating Terrain .....	394
Animating Water .....	395
Animating People .....	395
Animation Tips .....	396
Frame Count .....	396
Previewing .....	396
Trial Runs .....	397
Final Rendering .....	397
Batch File Rendering .....	398
Summary .....	398

<b>10 Postprocessing</b> .....	<b>399</b>
What is Postprocessing? .....	399
Using Animator and Animator Pro .....	399
Postprocessing Animation .....	400
Postprocessing Still Images .....	400
GIF Files and FLI Files .....	401
File Conversion .....	401
Colors and the Color Palette .....	401
Antialiasing .....	402
Animator Players .....	402
Other Postprocessing Software: Animator Clips and CHAOS .....	403
Animator Clips .....	403
CHAOS .....	405
Where Enhancement is Used .....	405
Preparing for Postprocessing .....	405
Working with Color .....	407
Enhancing a Still Image .....	407
Combining Images .....	410
Enhancing with Clipart .....	415
Enhancing with CHAOS .....	417
Creating Animation from Scratch .....	418
Compositing Animation on a Still Image .....	423
Titling .....	423
Scrolling Titles .....	424
Flying Titles .....	425
Transitions .....	426
Using Poco Routines .....	426
Using High Resolution .....	427
Summary .....	427
<b>11 Presentations</b> .....	<b>429</b>
Choosing Presentation Media .....	431
Surveying the Audience .....	431
Audience Size .....	432
Audience Sophistication .....	432
Viewing Media .....	433
Understanding the Subject of Your Presentation .....	433
Using Visual Ideas in Your Presentations .....	433
Using Video in Your Presentations .....	434
Understanding Video Formats .....	435
Image Quality .....	436
Format Choice .....	437
Consumer versus Professional Decks .....	438
VHS Format .....	439
Super VHS Format .....	439
Hi-8mm Format .....	440
High-End Formats .....	440
Digital Recording .....	442
New Video Formats .....	443
Understanding Video Color Checking .....	444

Editing .....	445
Looking at Budget Considerations .....	446
Editing Costs .....	446
Duplication Costs .....	447
Packaging Costs .....	447
Real-Time versus Single-Frame Recording .....	447
Free-lance Video Presentation .....	449
Soliciting Work .....	449
Video Facilities .....	449
Using the Video Animation Starter Kit .....	450
A Word About Video Technology .....	451
Still Images .....	452
Using Slides in Presentations .....	452
Using Hard-Copy Images in Presentations .....	452
Using Plots in Presentations .....	453
Using 3D Plots for Renderings .....	454
Making 2D Drawings from 3D Plots .....	454
Understanding Multiple 3D Views using Paperspace	
Viewport Entities .....	454
Creating a Multiple Viewport "Drawing" .....	455
Using Computer Presentations .....	455
Performing Disk Presentations .....	456
Understanding Display Formats .....	456
Using CGA Format .....	458
Using EGA Format .....	461
Understanding AFEGA .....	462
AFEGA Exercise .....	464
AFEGA Tips .....	468
Other EGA Presentation Methods .....	469
Using VGA Format .....	470
Creating Live Presentations Using AutoCAD .....	471
Understanding Multimedia Presentations .....	472
Creating Presentations on Your Own Equipment .....	472
Using Sound in Your Presentations .....	473
Using Third-Party Software .....	473
Using Interactive Presentations .....	473
Exploring the Future of Multimedia .....	474
Exploring Video Walls .....	474
Exploring Electronic Encyclopedias .....	474
Exploring Virtual Reality .....	475
Using Service Bureaus .....	476
Summary .....	477
<b>12 Advanced Project Management .....</b>	<b>479</b>
What is Project Management? .....	479
Establishing the Scope of the Project .....	479
Who is Your Audience? .....	480
What Resources are Available to You? .....	480
Human Resources .....	481

Technological Resources .....	481
Hardware .....	481
Software .....	482
Available Time .....	482
Budget .....	482
Choosing the Most Effective Medium .....	482
Establishing the Level of Detail and Accuracy .....	483
Planning Your Project .....	484
Gathering Information .....	484
Scripts and Storyboards .....	485
Using Viewport Entities for Dynamic Storyboarding .....	486
Scheduling .....	486
Creating the Task List .....	487
Establish the Task Sequence .....	488
Outline the Project Constraints .....	488
Establishing Task Dependencies .....	489
Assigning Resources .....	489
Determining Available Hours and Days .....	489
Review the Schedule .....	489
Keeping the Project On-Track .....	490
Sample Task List and Gantt Schedule .....	490
Summary .....	491
<b>A Glossary .....</b>	<b>493</b>
<b>B Additional Software .....</b>	<b>499</b>
Paint Programs .....	499
Rendering Programs .....	501
Graphics Conversion Programs .....	502
Multimedia Authoring Programs .....	503
Human-Model Programs .....	503
Other Programs .....	504
<b>C Resources .....</b>	<b>505</b>
Books .....	505
Magazines .....	506
Electronic Bulletin Boards .....	508
<b>D Hardware Options .....</b>	<b>509</b>
Framebuffers .....	509
Video Output Cards .....	510
Single-Frame Controllers .....	510
Scanners .....	510
Video Capture Cards .....	511
Printers .....	511
Sound Cards .....	512
Optical Disks .....	512
Laserdisc Recorder/Players .....	513

<b>E Configurations .....</b>	<b>515</b>
Configuration 1: The Graphics Starter Kit .....	516
Configuration 2: The Video Starter Kit .....	517
Configuration 3: The High-Resolution Kit .....	519
Configuration 4: The Broadcast Animation Kit .....	521
Configuration 5: The Deluxe Kit .....	523
More Options .....	525
<b>F File Formats .....</b>	<b>527</b>
<b>Index .....</b>	<b>531</b>
